Education

Le Wagon Web Development Bootcamp

Lisbon, Portugal

Present Overview:

intensive, full-stack web development program that covers a wide range of modern web technologies and best practices.

- **HTML CSS**
- **Bootstrap**
- **JavaScript ES6**
- **SQL**
- **git GitHub**
- **Heroku**
- **Ruby on Rails.**

Front End Engineer, Codecademy

Gained in-depth knowledge in front-end development, covering:

- **React**
- **Redux**
- **Testing methodologies**
- **SEO practices**
- **Security best practices**

As a tech enthusiast, I have always excelled with computers, starting from high school in my home country. My passion for technology led me to recently complete an intensive coding bootcamp at Le Wagon.

Professional Experience

Receptionist, Be Lisbon

2023 – 2024 | Lisbon, Portugal

- Managed front desk operations, including guest check-ins, check-outs, and reservations.
- Addressed inquiries and provided support to asylum seekers.
- Coordinated with housekeeping and maintenance teams to ensure smooth operations.
- Processed payments and maintained accurate records.
- Resolved guest issues promptly and implemented systems to enhance operational efficiency.

- **Team Player:** Focused on collaboration and team cohesion.
- **Problem Solver:** Enjoys tackling challenges and learning new frameworks.
- **Effective Communicator:** Clearly conveys ideas and listens actively.
- **Time Management:** Efficiently prioritizes tasks to meet deadlines.

Projects

Reach the flag -

Javascript with P5JS library

- *Reach the Flag is a game that I created using JavaScript and the p5.js library.*
- *The player must reach the flag while dodging all the arrows and their own clones.*

Keybinder

Lua Scripting

- *A mini fun project where I built a keybinder for GTA San Andreas' online community.*

Time Machine Marketplace

Ruby on Rails

- *It's a fun project that I created with two other Le Wagon alumni. (clone of Airbnb)*
- *People can either rent a time machine or list their own time machine for others to rent*
- *During the project, we learned how to work as a team using Git and GitHub, and we were responsible for both the frontend and the backend development. The app was created within a week.*

Playpal

Ruby on Rails

Playpal is a web application project designed to help new residents in the country find a team to play a sports game or help teams find missing teammates based on their skill level. The app was created within 2 weeks.
